

BREAKING NEWS BREAKING NEWS BREAKING NEWS BREAKING NEWS BREAKING NEWS

SOKIMEX – The Largest Petroleum Company in Cambodia has selected to use our reputable products for the modernization of their new Retail Petrol Stations to increase their overall productivity & revenues.

We are very pleased to announce that one of our very important customers in Cambodia called **SOKIMEX** has decided to place their major purchase orders (contracts) for the supply of pressurised systems of our **Gilbarco China 6 hoses x 3 products Dispensers with Red Jacket Submersible Turbine Pumps (STP) and Veeder Root Underground Tank Gauges (UTG) systems.**

We are indeed very excited with our customer's final choice of our pressurised systems over other competitors' products available in the markets. They have evaluated our competitors' suction systems and pressurised systems and decided that our offered Products are the most suitable system to suit their overall application and long term needs.

Our customer's choice of our Pressurised System was strongly based on our better technical design, lower installation costs, eliminate vapour lock and ease in maintenance. The other beauty of our Pressurised System is the ease in doing pipelines leak testing without taking too much time during such set up and minimum time means maximum usages of the pumping systems to increase their operational productivity as well as increasing their revenues.

On top of that, our customer had visited some of our existing customers as well as our factory in China which had greatly impressed them and further strengthened their beliefs in our recommended products' reliable performances as well as our capabilities to provide our prompt after sales services.

This is a very prestigious project that we are very proud of and we would like to take this opportunity to express our sincerest appreciation for the support and confidence in us to our below listed customer and business partners.
